

SPECIAL

CHEMIST'S AND BAKER'S FURNITURE

The initial business activities of the Company **HASPO SYSTEM Ltd.** go back to the early 90-ies, when we started under the different trade name at the local market with the different versions and applications of the unit furniture.

The Company works from the year 1994 in the current form and with the current orientation. Thanks to the purchasing of modern CNC machinery, control systems and specializations, the Company has become one of the biggest furniture producers and it has become a renowned specialist in the area of kitchen, office, school, medical and hotel furniture. **HASPO SYSTEM** Company started its business activities with five people, but currently our team consists of eighty employees.

Thanks to the high accuracy of our products we can afford to deliver to our clients the furniture in the form of separate elements packed in the cardboard and assembled "on the spot". We also offer a separate production of the segments according to the drawings submitted by our customers.

The permanently growing export to the EU countries secured for twelve years already is the proof of the quality of our products.

TECHNICAL DESCRIPTIONS

FURNITURE FOR PHARMACIES

TABLES	Desktop – thickness 25 mm, ABS edges 2 mm. Metal legs in black and silver colour.
CABINETS	Body and doors - thickness 18 mm, ABS edges 2 mm. Back - thickness 4 mm, inserted into the half-groove and fixed by means of fasteners. Vertical adjustment by means of the legs (height of 150 mm) covered by the skirting board.
COUNTER	Segment bodies and the drawer front panels – thickness 18 mm. Desktop – thickness 28 or 38 mm, HPL surface or artificial stone.
GENERALLY	The melamine faced chipboards and the ABS edges guarantee that the furniture is resistant against any mechanical damage. Locks for the cabinets have to be ordered separately.

FURNITURE FOR BAKERIES

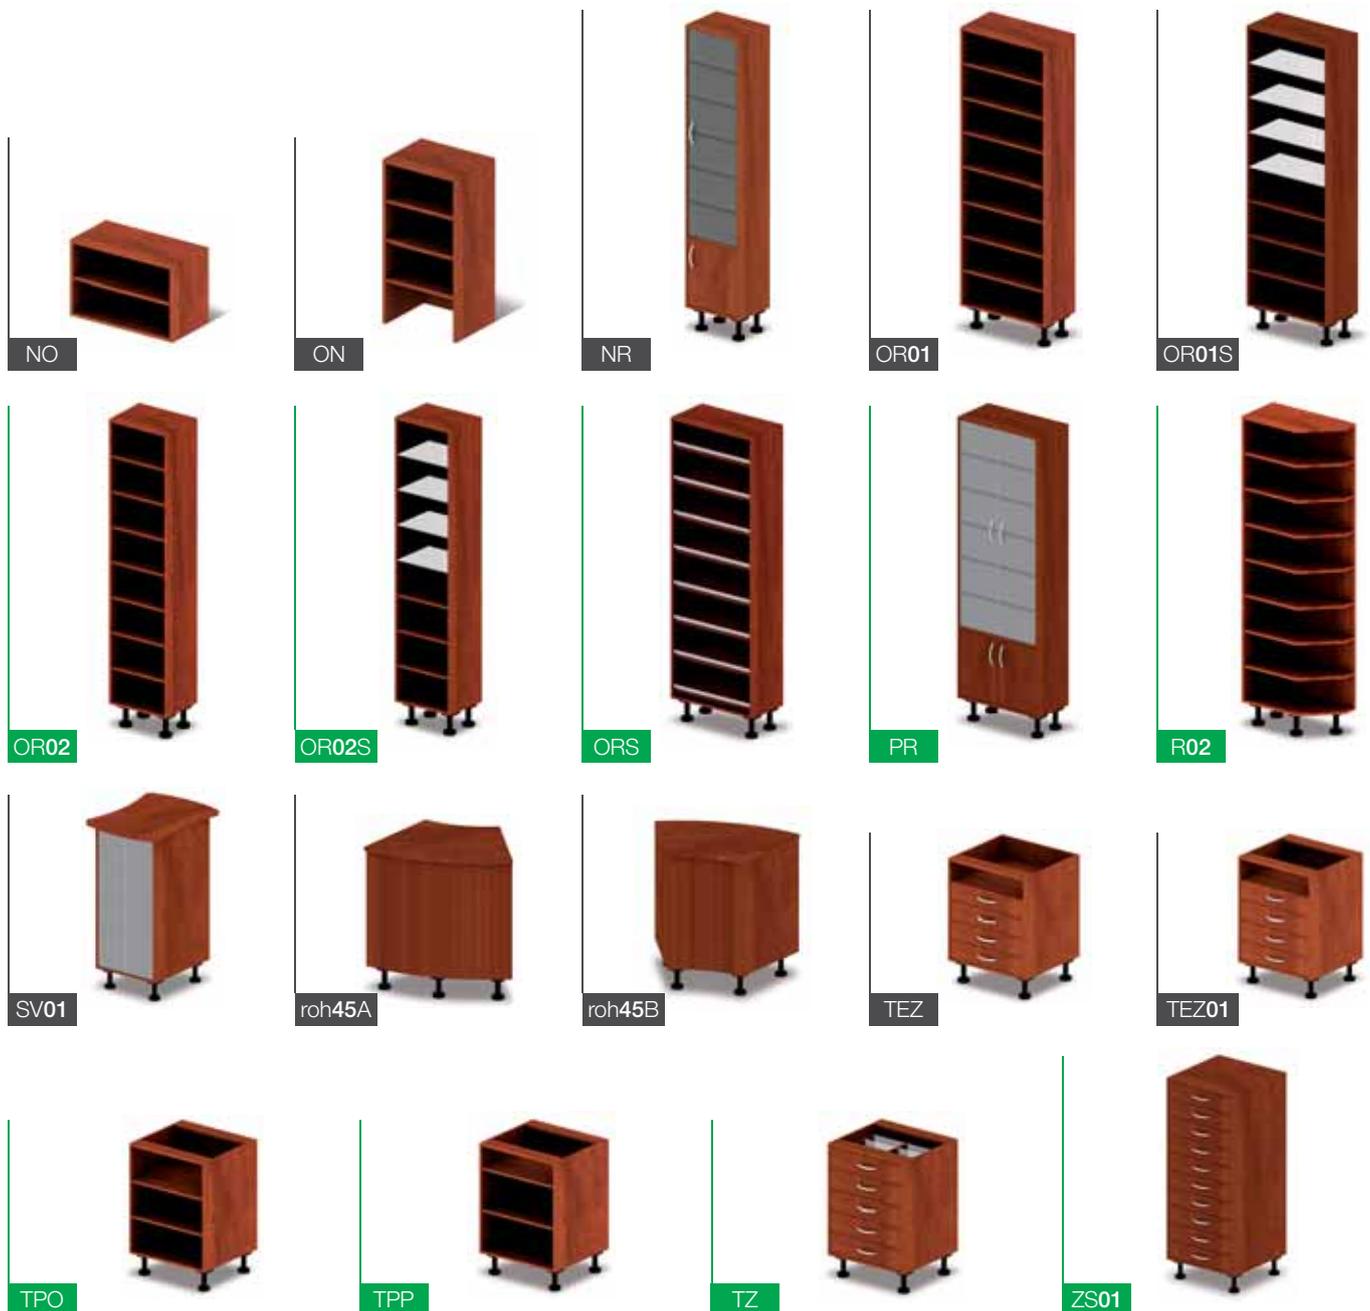

CABINETS	Body and doors - thickness 18 mm, ABS edges 0,8 mm. Back - thickness 8 mm, in the same pattern as the body. Vertical adjustment by means of the legs.
SHELF SPACE	Basic construction – metal racks with the vertical adjustment and openings for two-sided attachment of the cover boards, shelf holders and cabinets. The skirting board is made from the water-proof plywood (height 180 mm). The lighting slat and slanting mirrors are installed in the upper part of the shelf space.
COUNTER	Structure for the glass extender is made from the satin anodized aluminium. The used glass plates are in the straight or rounded version. The shelf for the bags is installed at the customer side.
GENERALLY	The melamine faced chipboards and the ABS edges guarantee that the furniture is resistant against any mechanical damage. Locks for the cabinets have to be ordered separately.
